Description of Project: My project is an album cover design for no specific artist or collection of songs. It is meant to fit the LoFi genre of music. The main design was inspired by the retro wave since it fits with lofi music since the music has “mistakes” such as electric static and background noise left in. It gives a calming cool feel. The silhouette of the girl is there since if you type in lofi to Google the first thing is “Lofi Girl”. The silhouette is not the exact character the Lofi Girl uses which keeps it more universal, but it still gives the feeling of her.
